## Nepcon Vietnam 17-19 November 2021

Nepcon Vietnam (NEV) want to express our concern for everyone impacted by COVID.

In the context of the ongoing restrictions in place across the country, we have made the decision to hold NEV in a fully digital format, across the planned dates of 17 – 19 November 2021.

While we were optimistic that NEV could run in hybrid format, after further consultation with our exhibitors, visitors, and partners, we have concluded that the safest option is to focus instead on delivering a successful digital event. We have taken this proactive decision in the best interests of our community.

We appreciate that this is disappointing news, however, the health and safety of our customers and staff is our number one priority and we remain guided by the expert advice of the government and public health authorities.

We will support your plans to refocus on the digital exhibition and do our utmost to help all our customers, partners and attendees to prepare accordingly.

We would like to thank everyone for the encouragement and support received during this challenging time.
